EXPERIENCE

Google Workspace Developer

Tracxn Technologies Nov 22 - Present

- Proficient in utilizing Google App Script and JavaScript to develop and manipulate databases, leveraging Google Workspace services to streamline workflows and enhance productivity.
- Demonstrated expertise in integrating various APIs, including Google Search, LinkedIn, and Tracxn, to gather relevant data and enhance the functionality of applications and databases.
- Successfully designed and implemented automated Management Information System (MIS) using JavaScript, allowing seamless delivery of critical information in HTML format to Gmail recipients.
- Customized CSS styles to create visually appealing and well-structured MIS reports, ensuring the presentation of data in the most effective manner.
- Provided comprehensive documentation for code, APIs, and databases, facilitating easy understanding and knowledge transfer among team members
- Leveraged JavaScript to efficiently extract and process data from Gmail, enabling smooth synchronization and updates to databases.
- Collaborated with cross-functional teams to identify and implement improvements, resulting in enhanced database performance and
- Resolved complex technical issues related to database operations, ensuring the continuous and accurate flow of information.
- Proactively contributed to the development of new features and enhancements, resulting in optimized data management processes.
- Maintained a proactive approach to stay up-to-date with emerging technologies and best practices, incorporating innovative solutions into database management workflows.
- Conducted thorough testing and debugging to ensure the reliability and accuracy of databases and MIS reports.
- Demonstrated effective communication and collaboration skills to work seamlessly with stakeholders and deliver exceptional results on various projects.

PROJECTS

Full Stack E-Commerce Website (MERN Stack with Bootstrap)

- Independently conceptualized, designed, and developed a fully functional e-commerce website using MERN (MongoDB, Express.js, React.js, Node.js) stack and Bootstrap framework.
- Created a user-friendly interface with React.js and Bootstrap, ensuring a seamless shopping experience on various devices.
- Integrated secure payment gateways, such as Stripe or PayPal, to enable safe and smooth online transactions.
- Implemented robust backend functionalities with Node.js and Express.js, including user authentication, product management, and order processing.
- Deployed the e-commerce website on cloud platform Heroku, ensuring high availability and scalability for potential traffic spikes.

Text Utility Web Application (Front-End Development using React.js)

- Developed a versatile text utility web application using React.js, catering to various text manipulation tasks.
- Implemented a user-friendly interface allowing users to perform actions like text formatting, word count, and character analysis.
- Leveraged React components and state management to ensure a responsive and efficient user experience, enhancing text-related

EDUCATION

B.E. in Telecommunication Engineering

Sir MVIT, Bengaluru

Class XII MDPS, Jaipur

Class X National Public School, Hanumangarh 2018 - 2022

[GPA: 7.2/10]

2017 - 2018

[Marks: 62.4%]

2015 - 2016

[GPA: 8.2/10]
